

Medicines in School

Our policy on this is that no medication will be given to any pupil. Very few medications need to be taken during normal school hours, and in most cases *three times a day* can be given before school, after school and at night. Parents are

invited to come into school to administer medicine if the dosage is different. Langley Fitzurse has a policy statement regarding this matter, if you wish to see the full document please contact the school office.

Moving On

At the age of 11, most children transfer to secondary school in Chippenham. Children are admitted to either Hardenhuish, Sheldon or Abbeyfield schools depending on parental choice. We have excellent liaison with all three schools and have regular contact. The children are

invited to spend a number of days in all the schools each year before a decision is made. In addition to this, some of the secondary school teachers visit our school to take lessons and help our children with the transition to the next phase of their education.

And Finally...

When your child is welcomed to Langley Fitzurse School, we hope that he or she will feel secure in our happy environment. We aim to foster a love of learning in all our pupils so that they can enter their later stages of education with confidence and enthusiasm.

We feel privileged that for several years we will share with you in the life and development of your son or daughter. It is our hope that this partnership with your family will be a successful and rewarding one.
